WHO WE ARE

A Preventive & Restorative Wellness Clinic

Prentice Memorial Clinic is a modern wellness and organ restoration center dedicated to helping individuals rebuild their health from the inside out.

We are not a symptom-management facility. We are a structured, disciplined and patient-centered practice focused on restoring organ function, strengthening the body’s systems and guiding long-term health transformation.

Led by Dr. Dwight Prentice, the clinic blends

clinical assessment with practical daily lifestyle correction. Every patient receives a clear roadmap — not confusion, not guesswork.
When you visit our clinic or our website, you experience clarity, order and direction.

WHAT WE TREAT

Comprehensive Organ Restoration & General Medical Care

We provide structured care for both complex organ challenges and common medical conditions.

Organ Restoration & Regenerative Support

• Brain support and structured stroke recovery guidance
• Kidney and renal restoration programs
• Liver repair and detoxification support
• Cardiac and cardiovascular strengthening
• Gut and digestive repair
• Hormonal and metabolic stabilization

Our approach emphasizes circulation, cellular

support, nutritional optimization and disciplined lifestyle correction.

General Health Conditions We Manage

- Malaria
- Typhoid
- Jaundice
- Peptic ulcer conditions
- Fibroids
- Hypertension
- Blood sugar imbalance
- Chronic fatigue

Each case is carefully evaluated. We combine medical review, lifestyle correction, nutritional guidance, herbal support and monitoring to guide responsible recovery.

OUR SIGNATURE ORGAN REPAIR PROGRAMS

Structured 3–6 Month Therapeutic Pathways

This is where Prentice Memorial Clinic stands

apart.

Our organ repair programs are not random supplement prescriptions. They are structured treatment plans with clear phases, measurable progress and active supervision.

Every program includes:

- Comprehensive clinical assessment
- Baseline evaluation and lab review where appropriate
- Strict dietary correction
- Structured lifestyle modification
- Targeted herbal and nutritional support
- Scheduled follow-ups
- Ongoing progress tracking

Our 3-Phase Model

Phase 1: Stabilize

Reduce stress on the organ and correct immediate triggers.

Phase 2: Repair

Support functional recovery and improve organ performance.

Phase 3: Strengthen

Build resilience and prevent relapse through

disciplined lifestyle habits.
Patients are guided step by step. Healing is intentional, not accidental.

WHY OUR APPROACH IS EFFECTIVE

Structured. Supervised. Sustainable.

Our effectiveness comes from clarity and discipline.
Many systems focus only on suppressing symptoms. Others offer unstructured therapies without monitoring. We combine structured medical oversight with lifestyle transformation.
Here is why our model works:

- We address root causes — inflammation, metabolic stress, dietary triggers and lifestyle imbalance.
- We provide a clear roadmap with measurable goals.
- We combine diet, movement, stress regulation and targeted supplementation.
- We emphasize patient responsibility and active participation.

• We monitor and adjust protocols as progress is made.
Results improve when the process is supervised and structured.

THE EXPERIENCE

At Prentice Memorial Clinic, you will experience:
Clarity — you know exactly what the plan is.
Structure — every step has purpose.
Confidence — your care is supervised.
Support — you are not navigating alone.
Direction — healing is guided, not guessed.
Your health deserves a system. We provide that system.

TAKE THE FIRST STEP

Your recovery begins with one decision.
